Create An Android Application

| Team ID	PNT2022TMID05072
Project	Personal Expense Tracker Application

STEP 1: Start the Android studio ,create a New project and select the Empty Activity int new project prompt page.

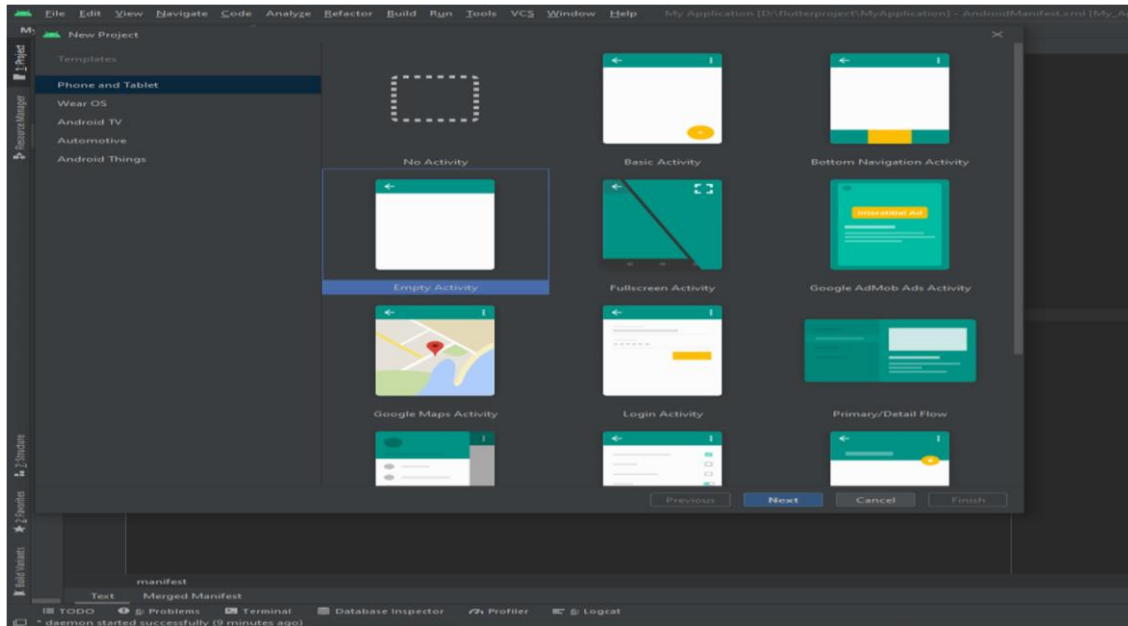

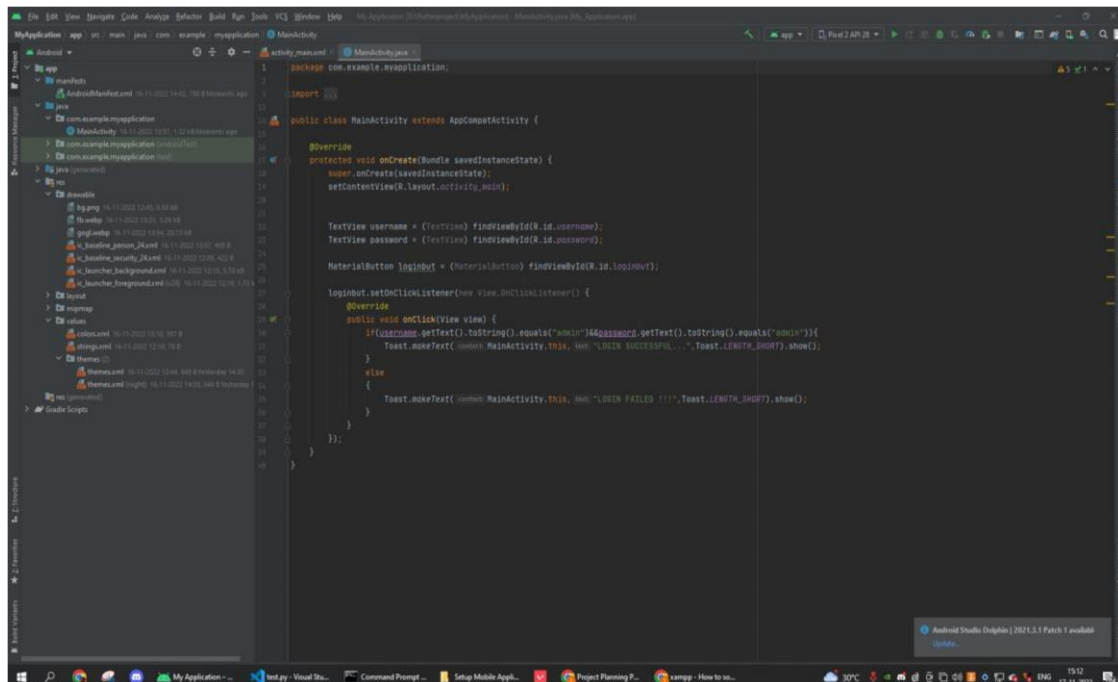

STEP 2: Then click next to select the required needed setup.
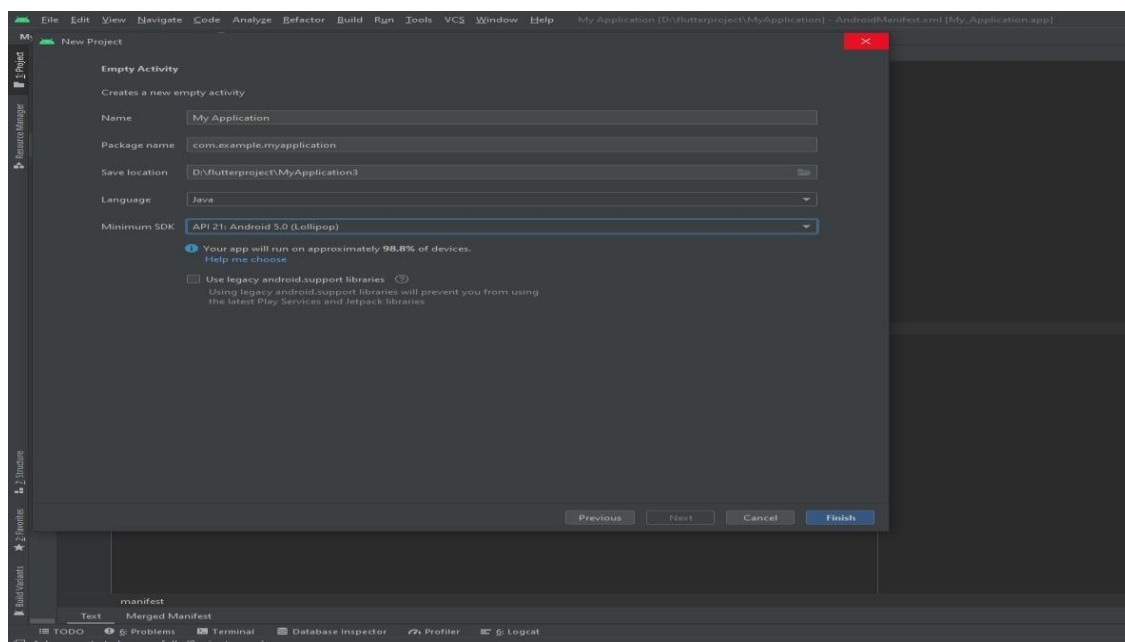

STEP 3: There is an activity_main.xml layout page to built the mobile application interface.

STEP 4: And also have MainActvity.java file,it is the first screen to appear when launches the app ,in here we do an current activity to the application class.

STEP 5: In the right side shown a preview of the mobile application interface.
